

I have been an Amateur Radio operator since 1956 and am almost age 62. Considering the many activities that people (especially the youth) are involved in today I strongly support RM-10787. We need to be able to encourage more people to get into Amateur Radio without having to pass a morse code test. I passed 20 WPM for my Extra Class license, but would be pleased for others to operate HF with no morse code requirements. Please approve RM-10787 as soon as possible. I am a member of the American Radio Relay League.
